**TO WHOM IT MAY CONCERN**

Dear Sir/Madam,

**RE: REQUEST FOR INDUSTRIAL ATTACHMENT OPPORTUNITY**

This is to introduce **Ryan Mwaniki (20-0911)**. Industrial attachment is a compulsory component of learning in the Department of **Computer Science** at Daystar University. The above mentioned student has completed the required course work in **Bachelor of Science in Applied Computer Science**. It's required that our students receive practical experience in their area of interest before they graduate.

In order to be able to do this, we rely on assistance extended to us by your organizations willing to accept our students on practical guided work. I would like to request you to consider the above named student for **THREE** months attachment within your company. We propose any of the following areas for exposure during the practicum:

- **Application Development (Mobile, Web, Console)**
- **Database Management & Design**
- **Network Management and Network Security**
- **Information Systems and Audit**
- **Technical support skills**
- **Interpersonal Skills**

We expect our students to be engaged in your organization for a minimum of 5 days every week for three months. The student should report on duty/station and fully comply with your employees' policy. This is meant to instill work ethics and culture. Hence this will ultimately help us attain unique high standards of discipline among our graduates.

We are truly grateful in advance for your partnership in the above request, and for your company's commitment to improving the quality of our undergraduates in **Applied Computer Science graduands** by exposing them to relevant, competitive and timely industrial I.C.T market skills. In case of any queries, please contact us.

**Sincerely,**

**Zipporah Mwololo**

**H.o.D Computer Science**
